- Secure any and all objects that can be used as a climbing aid to gain access to upper floors. Articles such as ladders, tables and chairs.
- Place adhesive security film to the inside of windows **AND SLIDING GLASS DOOR** to prevent the glass from being shattered, thus permitting entry into your home. Add a patio bolt for the sliding glass door.
- Obtain motion detection cameras to be directed toward the view of doors and windows. If motion is detected, the image will be transmitted to your portable electronic device to be remotely viewed. Immediately call 911 to relay a detailed description of the intruder to the dispatcher.
